

How pure are you?

Blue direct's tailored service
to corporate clients.

blue direct
THE WATER PEOPLE

"Blue direct provide a service of 160 machines to Brook Street branches nationwide. The Blue direct machines are extremely reliable. There are many advantages of their service over bottled water: less administration, no storage, and we have eliminated the Health and Safety risks from lifting heavy bottles."

"In deciding to use Blue direct, we compared them to all their major competitors, took up their customer references and were impressed with what we saw. The installation project ran smoothly with good communication and excellent service support. We are happy to be a Blue direct reference customer and recommend Blue direct to others."

Margaret Moran,

Purchasing and Distribution Manager, Brook Street.

Other reference customers are available on request.

How pure are you?

Most of us do not drink enough water. It is recommended that adults should drink at least 6-8 glasses of water daily and more in hot weather. Many companies see the advantages of encouraging employees to drink more water because:

- It keeps employees fit and healthy and have more energy
- It improves concentration and productivity
- It promotes better sleep at night and helps people to relax

To date, companies and organisations have addressed these issues with bottled water. Many are unaware of the value of access to fresh, filtered water. The benefits are:

- Consistently better water quality
- Reduced administration
- Reduced health and safety risks
- Reduced and predictable costs
- Continuous supply
- No storage problems
- More environmentally responsible

First for your thirst

As experts in point-of-use water systems, we can select individual dispensers to meet the needs of each and every location in a large organization:

- **Quality Approved Equipment** – our equipment is approved by the Water Regulations Advisory Scheme (WRAS) the UK mark of safety and quality for water coolers.
- **Models with no tanks and UV screening** – this removes the issue of standing water and contamination from airborne bacteria.
- **Attractive, easy to use, easy to clean, durable water dispensers**
- **Guaranteed Service Levels** – we guarantee our equipment, responsiveness, maintenance and repair – see back page.
- **Models designed for high capacity, easy filling** – we can offer machines that produce five times the normal amount of chilled water when compared to standard tanked machines.
- **Single Supplier of Drinking Solutions** – we also supply water boilers, vending machines and accessories including gas for sparkling water, coffee, cups, mats and product refills.

Free, No Obligation, Site Survey

Blue direct offers a free, no obligation site survey. Taking only 30 minutes, one of our experts will give you an overview of how we can help you improve employees' concentration and well being, identify any health and safety risks, and improve on the service of any existing suppliers.
